CAUTION WOOD DUST

General Information:

Sawing, sanding or machining wood products can produce wood dust, which can cause a flammable or explosive hazard.

Wood dust may cause lung, upper respiratory tract, eye and skin irritation. Some wood species may cause dermatitis and or respiratory allergic effects. The International Agency for Research on Cancer (IARC) has classified wood dust as a nasal carcinogen in humans.

Precautions:

Avoid dust contact with any ignition source.
Sweep and or vacuum dust for recovery or disposal.
Avoid prolonged or repeated breathing of wood dust.
Avoid dust contact with eyes and skin.

First Aid:

If inhaled, remove to fresh air. In case of contact flush eyes and skin with water. If irritation persists, call a physician.
