It's Time to Stop Guessing and Be Sure You are Applying the Correct Amount of Edgebanding Glue.

1 2 3 4 5 6

When running a test using EdgeCo's #5555 Clear PVC, you will virtually see how much glue is being applied. The above picture shows partial core components, edgebanded with EdgeCo's #5555 Clear PVC. Pictures #1 #2 and #3 show very little glue coverage. Picture #4 and #5 shows a nice coverage that gives a strong bond without wasting glue. Picture #6 demonstrates too much glue, a strong bond, however, over time a waste of money. Simply running periodic tests saves money while ensuring the integrity of your product.
